PROJECTS + PRODUCTS

ROOF RESTORATION PORTFOLIO.

See the power of restoration.

Real projects. Proven products.
Protection across roof types.

See our E-Systems Catalog here

toppsproducts.com **1-800-867-7177**

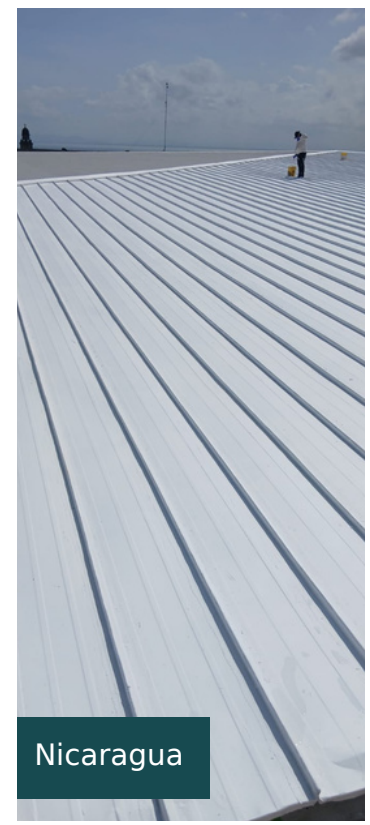

70+ years of roofing excellence.

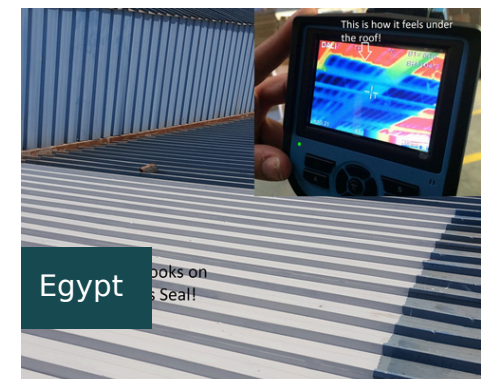

Used on **every continent around the world** for reliable roof protection and waterproofing.

Across roof types. Across the world.

Explore the transformations, then the repair products, coatings and systems that support the work.

Topps Products, Inc.

Metal roof restoration.

A continuous protective finish for this metal roof.

A side-by-side view of the same building before and after restoration.

Restored & upgraded.

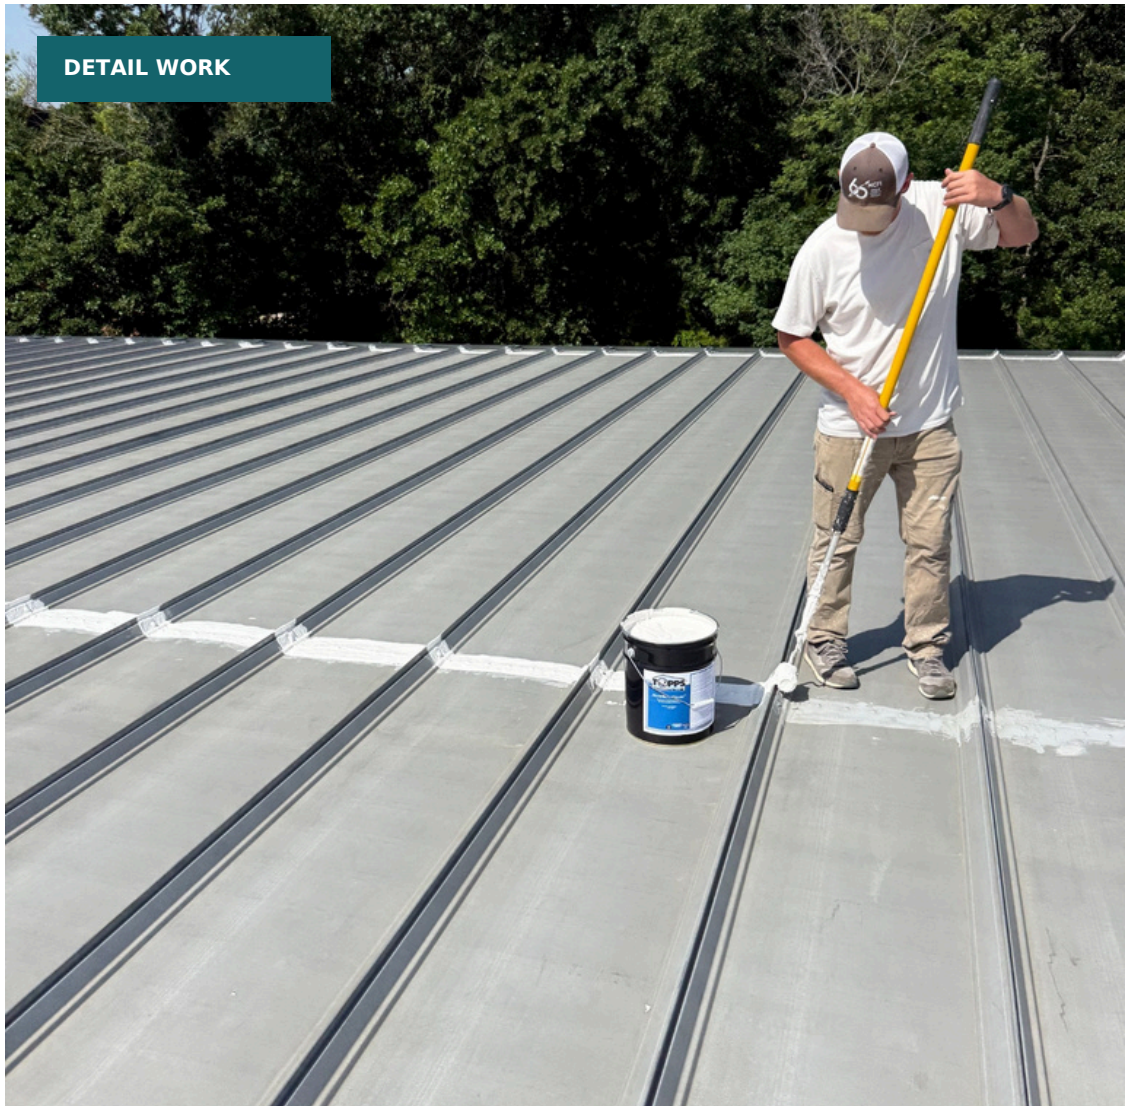

Topps Seal® Excel

Flexible protective coating to restore and upgrade this metal roof.

Protection is in the details.

Seam/RivetGuard™

Targeted protection at metal roof seams and fasteners helps address common water-entry points before the final coating.

Weathered metal. Renewed protection.

From exposed surface to restored roof.

The project photos show surface cleaning and preparation, followed by the finished result.

Restoration beyond white.

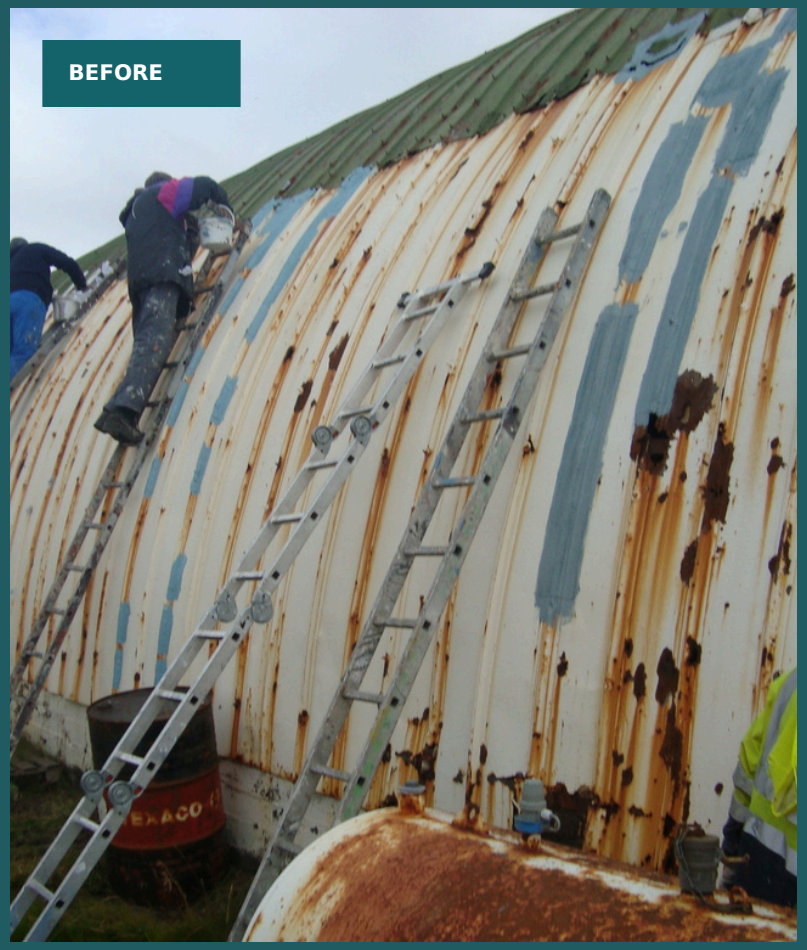

A finish that fits.

Topps Seal® color options bring roof protection and the finished appearance together.

McMurdo Station, Antarctica.

Topps Seal® is trusted for reliable protection in all climates.

This project is part of Topps Products' worldwide restoration experience.

An upgraded TPO roof.

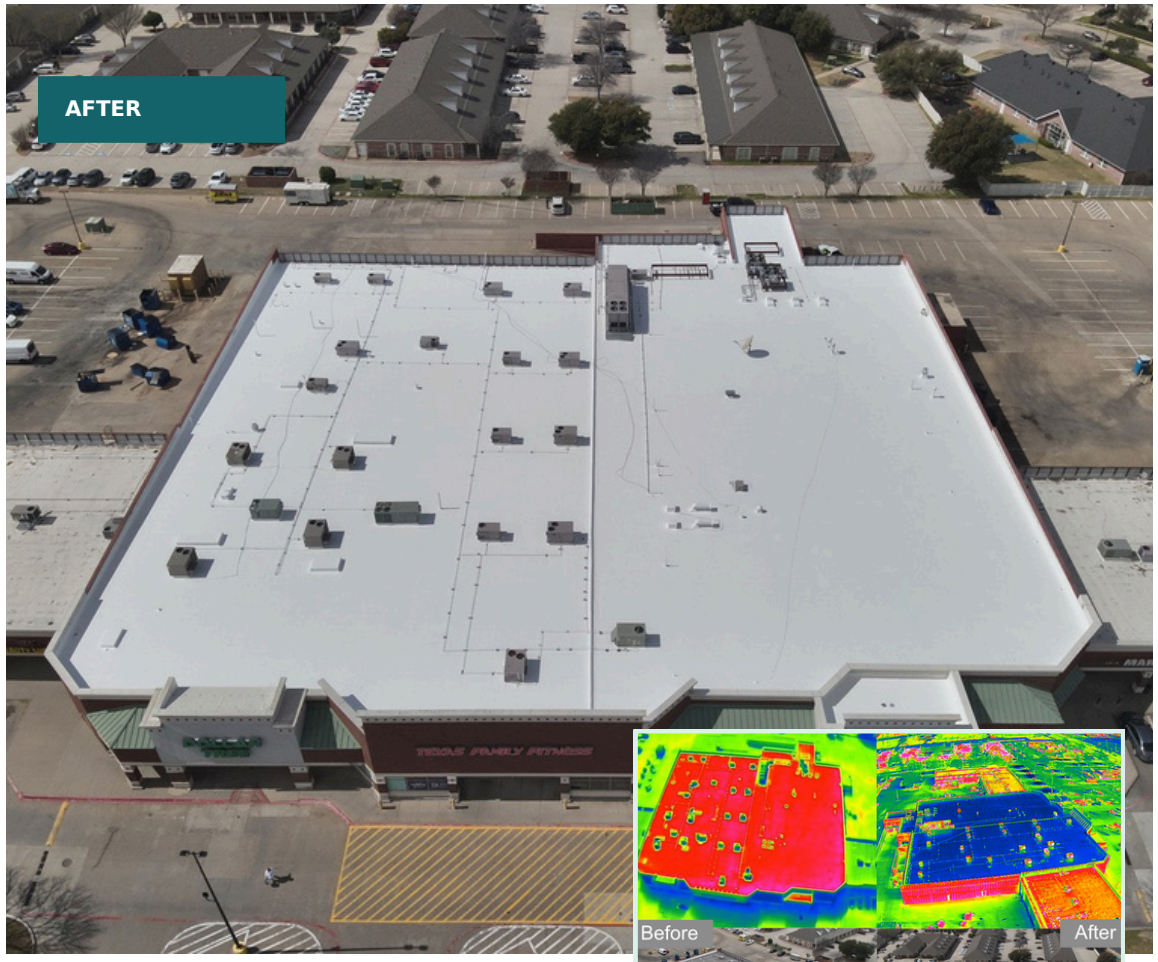

Upgraded using Topps High Build Silicone.

A restored white finish across the existing TPO roof for enhanced protection, cool-roofing and waterproofing.

Upgraded mod-bit roof.

Restore the roof already in place.

Before-and-after project views show the roof renewed with a protective white coating. **Topps Seal® is known for it's excellent cool roofing properties.**

From preparation to protection.

MultiUse Cleaner™ + High Build Silicone

Metal roof transformation.

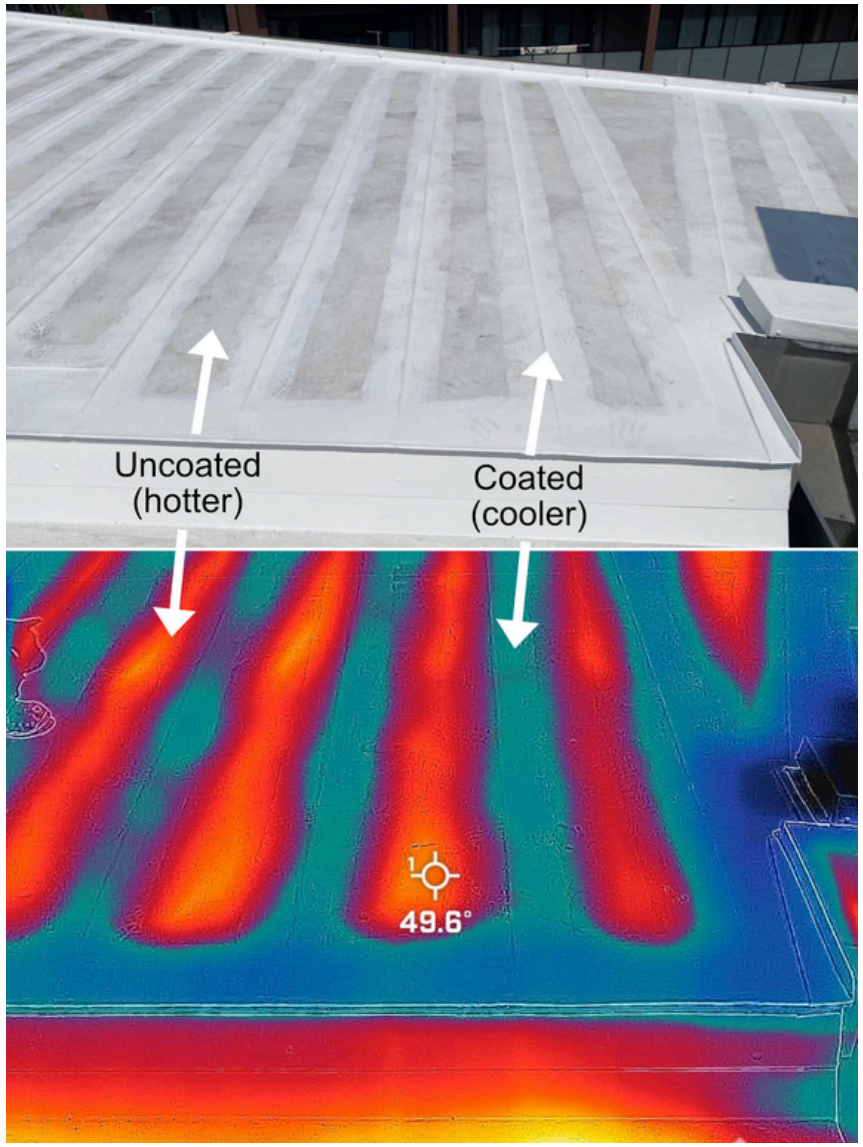

Same roof. A renewed finish.

The existing metal roof is shown before restoration and after the application of Topps Seal®.

Roof restoration in Japan.

Cooling roofs in Kenya.

Restoration in action

From a weathered metal surface to a newly restored system, Topps Seal® added years of life onto this roof with exceptional waterproofing, cool-roofing and protection.

Lasting protection starts with the details.

From seams and fasteners to cracks and flashings, Topps repair products help seal vulnerable areas and prepare roofs for restoration.

Proven products. Real-world application.

See the repair products roofers and contractors rely on, worldwide.

Polyprene®

All-rubber protection

A water-tight seal for flashings, seams, cracks, splits and other roof repairs.

Versatile repair cement

Designed for repairs across roof types.

Reinforce where needed

Accepts PolyCore™ polyester reinforcement for added strength.

Seam/RivetGuard™

SEAL VULNERABLE POINTS

Seals metal roof seams and fasteners to help prevent water entry.

MOVE WITH THE ROOF

Flexible protection accommodates expansion and contraction.

SIMPLIFY APPLICATION

One-coat application by spray, brush or squeeze bottle. Accepts PolyCore™ reinforcement.

Hybrid Silicone Roof Repair Patch

SEAL & PROTECT

Seals leaks, cracks, seams and damaged roof areas.

FLEX WITH THE ROOF

Flexible protection against weathering, UV exposure and ponding water once cured.

VERSATILE APPLICATION

Brush or trowel application across multiple roof types.

Choose the right coating for the job.

See all of our coatings here.

THERMOPLASTIC

Topps Seal®

Waterproofs and extends roof life with a flexible thermoplastic coating that resists weathering and reflects sunlight.

THERMOPLASTIC

Topps Seal® Excel

A tough, permanently flexible coating that withstands roof movement, resists weathering and helps reduce heat absorption.

SILICONE

High Build Silicone

A high-solids roof coating engineered for durability, waterproofing and ponding-water resistance.

Match the system to the surface.

ROOF / APPLICATION	CATALOG SYSTEM
